

# *Leadership Teams for the 21<sup>st</sup> Century*

*A Professional Development Offering*

*"It's all about learning!"*

## *Helping Schools Become Fully Implemented Middle Level schools!*

Middle schools face many challenges today. Research shows that schools with effective, collaborative leadership teams in place are better poised to move a school forward in positive ways. NELMS is pleased to offer a unique opportunity for leadership teams to collaboratively build their capacity to address their school and community challenges and meet their goals.

A Leadership team of four people from a school attends a two day training followed by two separate additional days. For complete costs and further information, please contact NELMS or visit [nelms.org](http://nelms.org).

### **5** *Great reasons to attend this four day series as a Leadership Team*

- *To develop a viable plan for action in your school*
- *To learn strategies that energize professional development and ensure the effective use of instructional strategies in your school*
- *To build a strong rapport within your Leadership Team which enables you to work with all staff in a dynamic and powerful way*
- *To refine the ability of the Leadership Team to discuss and problem solve challenges within your school*
- *To improve each team member's facilitation skills so that leading school improvement becomes imbedded and a shared responsibility*
